

UNIVERSITY POST GRADUATE COURSE

INTERVENTIONAL TREATMENT OF STRUCTURAL HEART DISEASE WITH MULTIMODALITY IMAGING

Director: Prof Giuseppe Tarantini
Vice-Director: Dr Chiara Fraccaro

GOALS & OBJECTIVES

The course's objective is to provide the cardiologist, heart surgeon and anesthetist with the theoretical and practical elements for an innovative and modern therapeutic approach to the patient suffering from structural heart disease, through the use of multimodal imaging. In particular, the master will focus on all round transcatheter aortic valve replacement for both native disease and bioprosthesis failure, transcatheter mitral and tricuspid valve repair, transcatheter occlusion of atrial and ventricular septal defect, patent foramen ovale and left atrial appendage, transcatheter treatment of paravalvular leak, all of them using different devices and vascular approaches.

MULTILEVEL TEACHERS IN CHARGE

Clinical Cardiologist: Sabino Iliceto

Interventional Cardiologists:

Chiara Fraccaro, Giulia Masiero, Massimo Napodano, Andrea Pavei, Giuseppe Tarantini

Echocardiographers: Patrizia Aruta, Antonella Cecchetto, Donato Mele, Valeria Pergola

Cardiac Surgeon: Gino Gerosa

Anesthesiologist: Demetrio Pittarello

Radiologist: Giorgio De Conti

Pathologist: Cristina Basso

The course takes place over **12 months** at the University of Padua. The mandatory attendance is **70%** of the whole course.

The participants, complying with safety national regulations about global pandemia, will have to attend the Padua Interventional Cardiology Unit as observes.

The didactic activities will include **lectures, exercise sessions, stages** as well as live sessions from the cath lab.

Deadline for application: 8 October 2021

Activity starting date: 12 November 2021
Activity ending date: 30 September 2022

Available places: min 8 / max 20 participants (max 5 NO-EU citizens)
Selection criteria: CV, publications, other titles that candidate may consider useful.

Registration contribution fee: EUR 5.000,00
