ADIPOsity, DIABETES AND PREMATURE DEATH IN A 15 YEAR FOLLOW-UP PROSPECTIVE STUDY OF 160,000 MEXICAN ADULTs. KNOWING THE KNOWN RISK FACTORS

Saluti introduttivi  Prof. Dario Gregori DCTV

RELATORE
DOTT.SSA Louisa Gnatiuc, University of Oxford

We are hosting a seminar to present findings from a contemporary mega-cohort of adults from a high-middle-income country that in the last few decades has experienced a major epidemiological transition from communicable to non-communicable diseases. The presentation will describe the burden and effects of adiposity and diabetes in a contemporary cohort of Mexican adults enrolled between 1998-2004. The event is for students and faculty interested in the epidemiology of diabetes and major preventable risk factors for premature mortality.

Info e contatti: dott.ssa Laura Cavaliere tel 049 8275382 e-mail: laura.cavaliere@unipd.it

Il seminario sarà disponibile on-line dal 28 settembre alla pagina web:
